The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/580,820	<b>Applicant(s)</b> WOODLEY, JOHN VIVIAN	
	<b>Examiner</b> SARAH WEBB	<b>Art Unit</b> 3731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 3,279,468 to Le Vine. In Figure 18, Le Vine discloses a therapeutic mask (22) that is configured for placement over a person's eyes and nose. Le Vine states that the mask is molded from compliant material (col. 7, lines 19-39). The mask includes multiple groups of apertures (39) and pressure points (33) over known acupressure sites, such as the cheekbone area. Figure 19 shows that the pressure points have mounting portions (42c) that are inserted into the apertures. Le Vine specifically explains that the pressure points are removably attached to the mask (col. 9, line 30) so that it can be adjusted for different faces. Regarding claim 4, the compressible pads (52) on the outer surface of the pressure points allow them to take on a curved shape when pressed against a curved surface of the user's face (col. 10, lines 28-30).

Regarding the term "passive", any of the protrusions on the mask are in a passive state while electrical energy is not being applied. Since the mask is capable of being placed on a user's face while in the passive state and the pressure points would function to apply pressure to the face in this state, the mask disclosed by Vine meets this limitation.
